Girard, Kansas, January, 1922.

Red Cedar,	8 to 12 inches,	1 year transplanted,	\$ 4.00 per 100
" "	12 to 18 "	" "	5.00 " "
" "	18 to 24 "	" "	7.00 " "
" "	24 to 30 "	" "	10.00 " "
" "	30 to 36 "	" "	15.00 " "

These cedars were gathered from the Ozark mountains and grown in Nursery for one year. The right stuff for City Parks, Cemeteries, Lawns, Driveways and Windbreakers. Lining out in Nursery and Retail trade.

We have about 20 thousand 2-year transplants, one-cent higher on each grade. A little better tops and roots. At these prices, nurserymen can afford to line out for retail trade and specimens for agents and dealers. Plant about same time you plant grafts. If you are not ready to plant upon receipt of cedars, heel in covering tops and roots to prevent evaporation of tops faster than roots can absorb.

Measurements made from top of roots to top of tree. Packing will be reasonable.
